HOW TO MAKE THE MOST OF YOUR VISIT?

Make your bookings to Al Ansab Wetland in advance.

- The best time to visit the Wetland is early morning and afternoon.
- Follow the instructions of our experts.
- You will see more if you move slowly, quietly and not dressed in bright colours.

FASCINATING AND BEAUTIFUL

Al Ansab Wetland is a natural wonderland in the heart of Muscat. It showcases the key elements of wildlife in Oman.

A bird watchers' paradise

You are invited to visit Al Ansab Wetland to enjoy a unique experience.

Explore the natural wonders of Al Ansab Wetland:

The Wetland is home to more than 300 species of birds that may be present at different times throughout the year.

Greater Spotted Eagle

Eagles arrive in November and may spend the winter in Muscat.

Blue Agama Lizard

The Black-Winged Stilt

Visitors can see wading birds such as the Black-Winged Stilt that are resident at the Wetland all year around.

More than just birds:

The Wetland is not just a special place for birds, it is also a safe haven for Oman's plants, butterflies and other species.

Blue Pansy Butterfly

Northern Shoveler

Open water (lagoons and pools) habitat:

Duck species (Red-crested Pochard, Ferruginous Duck, Garganey etc.), Greater Flamingo, Black-necked Grebe etc.

Daurian Shrike

Dense scrub habitat:

Warbler, Daurian Shrike, Turkestan Shrike, Thrushes, Bluethroat and Robin species etc.

Four different types of habitat:

There are four main habitats that attract different types of birds.

Crested Lark

Open rocky semi-desert habitat:

Raptor species (Imperial Eagle, Greater Spotted Eagle etc.), Lichtenstein's and Chestnut-bellied Sandgrouse, Grey Francolin, Wheatear, Lark and Bunting species etc.

Marsh Sandpiper

Reed Bed and Lagoon margins habitat:

Wader species (Marsh Sandpiper, Spotted Redshank, Common Snipe etc.), Baillon's crane, Spotted Crane, Squacco Heron and Little Bittern etc.
